The fastest and most powerful machines shooting up to 1200 m3 for 1 shot

The most dense fog among fogging systems thanks to 80% glycol in its fog fluid and the proprietary shooting technology based on fog cylinders

Double fog cylinder is the patented best solution to shoot fog and is very easy to change the cylinders as they do not need to be recharged, when the first is empty the machine switch automatically to the second

Thanks to the massive insulation ur fog fogging systems have a very low power consumption and can shoot for longer time in absence of main power, temperature is stable all the time .

Another exclusive, patented and very useful plus that allows to detect automatically if the nozzle is tampered and tries to shoot out anything that stops the nozzle besides sending an advise signal

A unique serial bus to plug on the electronic board an add on board that allow to make easily interface cards for direct connections with alarms and to allow the full control of the machine even from remote, it has a standard protocol for all machines

The UR FOG Fog Cannons are cutting edge and innovative as technology and performance to offer the best possible protection against theft and are protected by numerous patents.

The UR FOG Fog Cannons have been certified and tested to ensure maximum safety and reliability. The mist leaves no residue and is certified to be nonhazardous to humans and animals.
